a

Causes of incorrect BixBench-Verified-50 runs

b

Accuracy of one run and of consensus across replicates

c

One analysis step as each condition records it

bix-16-q1, GPT-5.6 Luna, replicate 1

	Galaxy job record	Custom-code trace
Tool and version	featurewise_correlation 0.1.0+galaxy3 (Tool Shed identifier)	Inline Python script; pandas, NumPy and SciPy installed with unpinned pip
Parameters	Fields: method = spearman; transform_b = negate; min_pairs = 3	Written in the code; essentiality taken as −ρ when ranking
Inputs and outputs	2 input and 2 output datasets, linked by identifier in the history	Inputs named in the code; results printed to the log only
Status	Job state "ok", exit code 0	Exit code per command (5 of 21 analysis commands failed)
Answer	CDKN1A (accepted)	CDKN1A (accepted)

The decisive choice is a stored field: DeepSeek V4 Pro r3 left transform_b = none and answered CCND1.

d

Galaxy token use relative to custom code
