

a Galaxy interface calls by operation

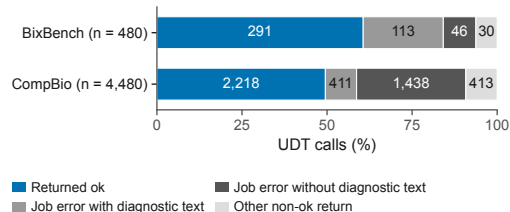

b Tool discovery

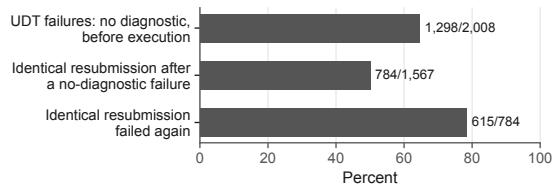

c Why failed Galaxy calls failed

d UDT call outcomes

e Failures without diagnostics

f Token-reduction intervention: results placeholder

RESULTS PENDING — placeholder until intervention results are confirmed and finalized

Planned BixBench-Verified-50 comparison: frozen baseline, prompt/skill changes, MCP/execution changes and both (2 × 2), with a contemporaneous code arm. Archived reference point: GPT-5.5 Galaxy/code total input = 2.82×. No reduction is reported here.
