

**d    A selected case: variant-status-q1 (CompBioBench)**

Read-end artefacts mimic an alternate allele; answers are not shown

|                 | Custom code                     | Galaxy                          |
|-----------------|---------------------------------|---------------------------------|
| GPT-5.5         | ● ○ ○                           | ○ ○ ○                           |
| GPT-5.6 Sol     | ○ ○ ○                           | ○ <span>●</span> <span>●</span> |
| GPT-5.6 Luna    | <span>○</span> ○ ○              | ○ ○ ○                           |
| DeepSeek V4 Pro | ○ <span>●</span> <span>○</span> | ○ ○ ○                           |

● accepted    ○ rejected    ○ ran a read-position diagnostic (5 runs)  
4 of 24 runs accepted. GPT-5.6 Sol in Galaxy ran the diagnostic as a UDT in replicates 2 and 3, and both were accepted; 3 custom-code runs also ran it (1 accepted).
